Dear Im, Weisberg -

Relative to your Whitewash II, which is on Atrenely great book, I should like to point out something I reproduced right after page 192 with the series of Japrender frames reproduced in Lefe "magazine, usere dates how. 25, 1966 unles suption " 4 marter of reasonable doubt, First off, you can detert the white gloved hand of mis Kennedy reaching out in the altyens photo. In the "Life sequence this gloved hand is nowhere visible as late as #244 which is the last they show. If altyon photo is supposedly from \$210 or the first shot - there is a blown up photo of frame # 236 of this Life issue, (page 46) and still the gloved hand is nowhere verible. How then can altyens original photo be "the first shot"? also Sov. To Connelly never turned that far right, exabling the viewer to see the back of his head and left ear until frame # 244 at the very earlest,

Secondly, in your original altgers sphots - on the extreme right side there stands a mon dressed in what

seems to be soveralls. Example:

This gentleman can also be observed in the Jagrender frances reproduced in dife "/25/66 feet as you can see in the "eriginal" altyres plats in your book, his left heart is at an angle downward from his body whereod from #272 to about 233 in Life his arm is decidely up and woring. Therefore, if Life shows the President hit first behind the sign, it downst correspond with the altyres photo which the F.B. I says is from #210 and the first shot. I feel it is just after the second but a fraction before the third. Something is radially wrong.

I withhold my nome due to reasing the too much about what hoppens to observant people and I heartly agree he coward was railroaded.
